# Backed by a Security Operations Center

24/7 Fully Managed SOC Protecting You

The Stark Reality: Cyberattack Immunity is a Myth

In today's cyberthreat environment, small-to medium-sized businesses are finding themselves in the crosshairs of cybercriminals. Immunity to cyberthreats doesn't exist, so staying agile and building a proactive defense is critical in protecting your operations.

More and more, traditional cyber technologies such as antivirus or anti-malware are not enough. In an era of increasingly sophisticated threat actors, targeted towards businesses like yours, *how prepared are you to defend against them?*

> **90% of respondents say their organization cannot detect, contain, and resolve threats within an hour.**
> *Palo Alto Network's The State of Cloud Native Security Report 2023*

> **By 2025, lack of talent or human failure will be responsible for over half of significant cyber incidents.**

Defining the Value of a SOC

Protecting your business is synonymous with protecting your customers. That's why businesses who are serious about their cybersecurity partner with a managed service provider offering in-depth security expertise, human threat analysis, 24/7 monitoring, and immediate incident response. With our security operations center (SOC), our response is faster, we minimize damages and costs, and safeguard your data and business continuity.

Combining SOC with True 24/7 MDR Services

A SOC is equipped to identify and prevent cyberthreats in real time. Regardless of how many endpoints, networks, assets, or locations an organization spans, SOCs provide a centralized view to ensure that they are monitored and performing as needed. *However, is there a way to level up your cybersecurity strategy further?*

OUR SOC

FIRM UP YOUR DEFENSE

Our SOC team helps streamline how you face modern, advanced cyberthreats. The 24/7 team is focused on catching breaches and rapidly responding to contain them. Made up of former US Intelligence cyber experts with real-world experience, their only mission is to monitor your networks and detain advanced threats before lateral spread compromises your livelihood.

OUR MDR

BUILD OUT YOUR OFFENSE

The SOC operates through our proprietary MDR technology to combine network visualization, insider threat monitoring, anti-malware, traffic analysis, and endpoint security for a comprehensive, offensive strategy. This enables them to add context to your data sources, enhancing data context for actionable threat management.

On average, our SOC takes:

16 minutes
to detect and respond to on-premises security incidents.

7 minutes
to detect and respond to cloud security incidents.

UNIVERSAL DATA
INCORPORATED

Your Partner in Protection

Our world-class cybersecurity ecosystem is designed to serve your business by completing the hard work for you. Our streamlined onboarding experience gets you covered without compromising your efficiency.
